Introduction

Managing Agile Teams in Large Enterprises is a comprehensive 5-day course designed to equip managers and team leaders with the skills required to effectively implement and manage agile methodologies within large organizations. This course will address the unique challenges faced by larger teams and provide participants with practical tools and strategies for successful agile adoption and management.

Objectives

- Understand the principles of Agile and how they apply in large enterprise settings.
- Learn the best practices for scaling Agile frameworks across multiple teams.
- Develop skills to manage cross-functional teams effectively.
- Recognize and navigate the challenges of cultural and organizational change.
- Implement tools and techniques to sustain Agile practices enterprise-wide.
