Project Management Training Courses

Course Venue: Malaysia - Kuala Lumpur

Course Date: From 17 August 2025 To 21 August 2025

Course Place: Royale Chulan Hotel

Course Fees: 6,000 USD

Introduction

This professional course on Environmental and Sustainability Projects is designed to provide participants with the knowledge and skills necessary to plan, implement, and manage effective sustainability initiatives. Over the span of five days, attendees will explore key concepts, strategies, and practical tools needed to address environmental challenges and contribute to sustainable development.

Objectives

- Understand the principles of environmental sustainability and their application in real-world projects.
- Develop the ability to assess environmental impacts and identify opportunities for sustainable practices.
- Learn project management techniques specifically tailored for sustainability projects.
- Explore innovative solutions and technologies that support environmental objectives.
- Foster collaborative skills to engage stakeholders in sustainability initiatives.

Course Outlines

Day 1: Introduction to Environmental Sustainability

- Overview of sustainability concepts and their importance.
- Global environmental challenges and opportunities.
- The role of sustainable development goals (SDGs).
- Key stakeholders in sustainability projects.
- Case studies of successful sustainability initiatives.

Day 2: Environmental Impact Assessment (EIA)

- Principles and processes of EIA.
- Methods for assessing environmental impacts.
- Legal and regulatory frameworks.
- Public participation in EIA.
- Preparing and reviewing EIA reports.
