

London TDM

Procurement and Supply Chain Management Training Courses

Course Venue: United Kingdom - London

Course Date: From 15 February 2026 To 19 February 2026

Course Place: London Paddington

Course Fees: 6,000 USD

Introduction

The "Supply Chain Sustainability and ESG Reporting" course is designed to equip professionals with comprehensive knowledge and skills necessary to implement sustainable practices in their supply chain operations and to effectively report on Environmental, Social, and Governance (ESG) metrics. This course will guide participants through analyzing sustainability challenges, implementing best practices, and adhering to global reporting standards.

Objectives

- Understand the principles of supply chain sustainability.
- Analyze the impact of ESG factors on supply chain operations.
- Learn techniques for integrating sustainability into supply chain management.
- Gain insights into ESG reporting frameworks and standards.
- Develop strategies to enhance supply chain transparency and accountability.

Course Outlines

Day 1: Introduction to Supply Chain Sustainability

- Overview of supply chain sustainability concepts
- The importance of sustainability in modern supply chains
- Key challenges in implementing sustainable supply chains
- Stakeholder expectations and value creation
- Case studies of sustainable supply chains

Day 2: Understanding ESG Factors

- Defining Environmental, Social, and Governance (ESG) factors
- How ESG impacts supply chain management
- Case studies of ESG integration in supply chains
- Identifying key ESG metrics and indicators
- Tools and technologies for tracking ESG performance

Day 3: Integrating Sustainability into Supply Chain Management

- Strategies for sustainable sourcing and procurement
- Green logistics and transportation best practices
- Promoting a circular economy within the supply chain
- Supplier collaboration and partnership management
- Risk management and sustainability resilience in supply chains
