

London TDM

# Health, Safety, and Environment (HSE) Training

**Course Venue:** Malaysia - Kuala Lumpur

**Course Date:** From 02 August 2026 To 06 August 2026

**Course Place:** Royale Chulan Hotel

**Course Fees:** 6,000 USD

## Introduction

The "Energy Efficiency and Environmental Compliance" course is designed to equip professionals with the knowledge and skills necessary to implement energy-efficient practices while ensuring adherence to environmental regulations. Over the span of five days, participants will explore various strategies for optimizing energy use, understanding regulatory requirements, and applying best practices to promote sustainability within their organizations.

- Understand the principles of energy efficiency and their environmental impact.
- Learn about key environmental regulations and compliance requirements.
- Explore strategies to optimize energy consumption in various sectors.
- Identify tools and technologies that enhance energy efficiency.
- Develop action plans for integrating energy efficiency into organizational practices.

## Course Outlines

### Day 1: Introduction to Energy Efficiency

- Overview of Energy Efficiency: Definition and Importance
- Global and Local Energy Challenges
- Basics of Energy Audits and Assessments
- Key Terminologies in Energy Management
- Case Studies: Successful Energy Efficiency Initiatives

### Day 2: Regulatory Framework and Compliance

- Introduction to Environmental Regulations
- Understanding Compliance Requirements
- Role of Government and International Bodies
- Penalties and Incentives for Compliance
- Case Studies: Compliance Best Practices

### Day 3: Strategies for Energy Optimization

- Identifying Energy Efficiency Opportunities
- Implementing Energy Management Systems (EnMS)
- Technological Innovations in Energy Conservation
- Behavioral Change and Its Impact on Energy Use
- Case Studies: Strategic Improvements in Different Sectors

### Day 4: Tools and Technologies for Energy Efficiency

- Introduction to Energy Efficiency Technologies
- Heat Recovery and Renewable Energy Systems
- Smart Grids and Energy Storage Solutions
- Building Automation Systems
- Software for Energy Monitoring and Analysis

### Day 5: Developing and Implementing Energy Efficiency Plans

- Setting Energy Efficiency Goals and Objectives
- Creating Action Plans and Roadmaps
- Stakeholder Engagement and Communication
- Measurement, Verification, and Reporting
- Evaluating Success and Continuous Improvement
