London TDM

Health, Safety, and Environment (HSE) Training

Course Venue: Malaysia - Kuala Lumpur

Course Date: From 08 March 2026 To 12 March 2026

Course Place: Royale Chullan Hotel

Course Fees: 6,000 USD

Introduction

In this comprehensive 5-day course, participants will learn how to design and deliver effective safety training programs. This course provides practical skills and knowledge for creating engaging and informative training sessions that enhance workplace safety and compliance. Participants will leave with the confidence and tools needed to develop tailored safety programs that meet industry standards and organizational needs.

Objectives

- Understand the fundamentals of safety training program design.
- Gain skills in delivering engaging and educational sessions.
- Learn methods to evaluate and improve training effectiveness.
- Explore strategies for adult learning and engagement.
- Develop customized safety training plans for various industries.

Course Outlines

Day 1: Fundamentals of Safety Training Design

- Introduction to safety training and its importance
- Understanding regulatory and compliance requirements
- Identifying training needs and audience analysis
- Setting objectives and outcomes for learning
- Developing a training plan roadmap

Day 2: Content Development and Instructional Design

- Principles of effective instructional design
- Creating engaging content and materials
- Incorporating multimedia and technology in training
- Crafting case studies and real-world scenarios
- Designing assessments and feedback mechanisms

Day 3: Delivery Methods and Techniques

- Exploring different delivery methods: in-person, online, hybrid
- Effective presentation and communication skills
- Facilitating interactive and participative sessions
- Using simulations and role-playing in training
- Managing group dynamics and challenging participants

Day 4: Evaluating Training Effectiveness

- Methods for assessing training outcomes
- Collecting and interpreting feedback and data
- Continuous improvement and revision of training programs
- Aligning metrics with organizational safety goals
- Reporting results to stakeholders

Day 5: Customization and Implementation

- Adapting safety training to specific industries
- Integrating company policies and safety standards
- Developing a rollout and implementation plan
- Handling resistance and fostering a safety culture
- Case studies and group project presentations
