Introduction

Infrastructure Asset Management is a critical discipline for maintaining and improving the value of physical infrastructure assets. This 5-day professional course is designed to equip participants with the knowledge and skills needed to effectively manage and optimize infrastructure assets. It covers various essential aspects, including strategic planning, risk management, lifecycle analysis, and performance measurement, enabling participants to address challenges and make informed decisions.

- Understand the fundamentals of infrastructure asset management.
- Develop strategic asset management plans.
- Learn to implement lifecycle management strategies.
- Assess and mitigate risk in infrastructure management.
- Measure and evaluate asset performance and sustainability.
