

London TDM

Information Technology and Digital Transformation Training Courses

Course Venue: United Arab Emirates - Dubai

Course Date: From 31 May 2026 To 04 June 2026

Course Place: Downtown Dubai

Course Fees: 5,000 USD

Introduction

ERP Systems Implementation and Optimization is a comprehensive 5-day course designed to equip professionals with the skills and knowledge necessary to effectively implement and optimize Enterprise Resource Planning (ERP) systems. Participants will learn about the latest tools, techniques, and best practices needed to ensure successful ERP projects, align business processes with system capabilities, and maximize operational efficiency. Whether you are new to ERP systems or looking to enhance your expertise, this course provides the essential insights for leveraging ERP technology to drive organizational success.

Objectives

- Understand the fundamentals and components of ERP systems
- Learn how to plan and execute successful ERP implementations
- Gain insights into optimizing existing ERP systems for better performance
- Identify strategies for change management during ERP projects
- Explore future trends and innovations in ERP technology

Course Outlines

Day 1: Introduction to ERP Systems

- Overview of ERP systems and their importance
- Key components and modules of ERP systems
- Understanding the ERP implementation lifecycle
- Introduction to major ERP platforms and vendors
- Case studies: Successful ERP implementations

Day 2: Planning for ERP Implementation

- Business process analysis and mapping
- Defining project scope and objectives
- ERP system selection and evaluation criteria
- Developing a comprehensive implementation plan
- Risk management strategies for ERP projects

Day 3: Executing ERP Implementation

- Project management methodologies and best practices
- Designing and configuring ERP systems
- Data migration and integration processes
- Testing and quality assurance techniques
- Go-live preparation and execution

Day 4: Optimizing ERP Systems

- Assessing and measuring ERP system performance
- Identifying areas for process improvement
- Customizing and enhancing ERP functionalities

- Utilizing analytics and reporting tools
- Continuous improvement and maintenance strategies

Day 5: Change Management and Future Trends

- Understanding the role of change management in ERP projects
- Effective communication and training strategies
- Building user acceptance and engagement
- Exploring emerging trends and technologies in ERP
- Preparing for digital transformation and innovation
