Introduction

This 5-day professional course on "Critical Thinking and Problem Solving" is designed to equip participants with essential skills to analyze situations, make informed decisions, and devise effective solutions. Through interactive sessions, practical exercises, and real-world case studies, participants will enhance their ability to think critically and solve problems efficiently in a professional setting.

Objectives

- Develop an understanding of critical thinking and its importance in the workplace.
- · Learn techniques to enhance problem-solving abilities.
- Apply critical thinking skills to real-life business challenges.
- · Improve decision-making processes through analytical thinking.
- Enhance creativity and innovation in problem-solving.

Course Outlines

Day 1: Introduction to Critical Thinking

- Understanding the concept and value of critical thinking.
- The role of critical thinking in business success.
- · Identifying personal thinking styles and biases.
- · Techniques to cultivate a critical thinking mindset.
- Practical exercises to challenge assumptions.

Day 2: Problem-Solving Frameworks

- Overview of problem-solving processes and frameworks.
- Identifying and defining problems accurately.
