

London TDM

Security Management and Risk Protection Training Courses

Course Venue: Malaysia - Kuala Lumpur

Course Date: From 19 October 2025 To 23 October 2025

Course Place: Royale Chulan Hotel

Course Fees: 6,000 USD

Introduction

Executive Protection and VIP Security is a specialized field in the security industry, focusing on the planning and implementation of strategies to protect high-profile individuals. This course aims to equip participants with the necessary skills and knowledge to effectively assess risks, plan security operations, and execute strategic interventions to ensure the safety of executives and VIPs. Across five intensive days, participants will engage in both theoretical training and practical exercises designed to deepen their understanding of executive protection.

Objectives

- Understand the fundamentals and principles of executive protection.
- Develop risk assessment and threat analysis skills.
- Master planning and operational aspects of security operations.
- Enhance situational awareness and advanced surveillance detection.
- Implement effective communication and coordination tactics during high-risk scenarios.

Course Outlines

Day 1: Introduction to Executive Protection

- Overview of Executive Protection and VIP Security.
- Roles and responsibilities of protection agents.
- Legal and ethical considerations.
- Identifying potential threats and risks.
- Protective intelligence gathering and analysis.

Day 2: Risk Assessment and Threat Management

- Diving deep into risk assessment processes.
- Developing threat profiles and attack scenarios.
- Case studies of high-profile security breaches.
- Conducting site surveys and vulnerability assessments.
- Mitigation strategies and contingency planning.

Day 3: Security Operations and Logistics

- Planning and executing security operations.
- Coordination with local law enforcement and agencies.
- Vehicle convoy operations and route planning.
- Access control and perimeter security measures.
- Event security planning and management.

Day 4: Surveillance and Counter-surveillance Techniques

- Understanding surveillance techniques used by adversaries.
- Implementing counter-surveillance measures.
- Recognizing behavioral anomalies and suspicious activities.
- Use of technology and equipment in surveillance detection.

- Practical exercise in surveillance and counter-surveillance.

Day 5: Crisis Management and Emergency Response

- Building and leading a crisis management team.
- Effective communication and decision-making under pressure.
- Tactical emergency medical procedures (TEMS).
- Simulated emergency response scenarios.
- Review and debrief of course learnings and participant assessments.
