Introduction

The "Maritime and Port Security Operations" course is designed to provide comprehensive knowledge and skills for professionals involved in safeguarding maritime and port environments. This 5-day intensive course will cover key aspects of maritime security, including the latest threats, risk management strategies, international regulations, and emergency response planning, ensuring participants are well-equipped to implement robust security measures.

- Understand the framework of maritime and port security operations.
- Identify and analyze potential threats to maritime security.
- Implement effective risk management and mitigation strategies.
- Comprehend international maritime security regulations and their applications.
- Design and execute comprehensive emergency response plans.
