London TDM

Security Management and Risk Protection Training Courses

Course Venue: Malaysia - Kuala Lumpur

Course Date: From 15 March 2026 To 19 March 2026

Course Place: Royale Chullan Hotel

Course Fees: 6,000 USD

Introduction

The 5-day course on "Physical Security Systems and Design" is crafted for security professionals and facility managers who aim to enhance their understanding of designing and implementing effective physical security measures. The course will cover various aspects of physical security, including risk assessment, security technology, and system integration, ensuring participants gain comprehensive skills and insights.

Objectives

- Understand the fundamental principles of physical security design.
- Identify and assess potential security threats and vulnerabilities.
- Evaluate and integrate security technologies effectively.
- Develop a comprehensive security plan tailored to specific needs.
- Ensure compliance with relevant regulations and standards.

Course Outlines

Day 1: Introduction to Physical Security

- Overview of Physical Security
- Key Concepts and Terminologies
- Types of Physical Security Threats
- Legal and Regulatory Frameworks
- The Role of Physical Security in Organizational Security

Day 2: Risk Assessment and Analysis

- Conducting Security Surveys
- Identifying Security Threats and Vulnerabilities
- Analyzing Risk Impacts and Likelihoods
- Developing Risk Mitigation Strategies
- Documentation and Reporting of Risk Assessments

Day 3: Security Technologies

- Access Control Systems
- Surveillance and Monitoring Technologies
- Intrusion Detection Systems
- Perimeter Security and Barriers
- Integration of Security Systems

Day 4: Developing Security Plans

- Components of a Security Plan
- Creating Security Policies and Procedures
- Designing Security Layouts and Schematics
- Emergency Response Planning
- Review and Approval Processes

Day 5: Implementation and Evaluation

- Project Management for Security Installations
- Training and Drills for Security Personnel
- Evaluating Security System Performance
- Maintaining and Upgrading Security Systems
- Conducting Security Audits and Reviews
